

# Protocol Deviation Category and Sub-Category Table

Normalized controlled-value table generated from the provided category matrix. Exact duplicate pasted values were consolidated.

| Protocol Deviation Category    | Protocol Deviation Sub-Category                                                |
|--------------------------------|--------------------------------------------------------------------------------|
| AE/SAE Reporting               | AE reported out of window                                                      |
| AE/SAE Reporting               | SAE reported out of window                                                     |
| Concomitant/ Rescue Medication | Prohibited medication                                                          |
| Concomitant/ Rescue Medication | Concomitant/ Rescue Medication non-compliance                                  |
| Eligibility Criteria           | Inclusion Criteria not met                                                     |
| Eligibility Criteria           | Exclusion Criteria not followed                                                |
| Informed Consent/Assent        | Informed Consent/Assent not performed prior to study procedures                |
| Informed Consent/Assent        | Informed Consent/Assent not obtained                                           |
| Informed Consent/Assent        | Subject consented utilizing an ICF that has not been IRB approved              |
| Informed Consent/Assent        | Consent/Assent was not signed by appropriate individuals                       |
| Informed Consent/Assent        | Consent/Assent on invalid or outdated ICF                                      |
| Informed Consent/Assent        | Original ICF not available                                                     |
| Investigational Product/Device | IP Non-compliance                                                              |
| Investigational Product/Device | Incorrect IP dose administered                                                 |
| Investigational Product/Device | IP dose taken Out of Window                                                    |
| Investigational Product/Device | CRA unable to reconcile IP accountability                                      |
| Investigational Product/Device | Pharmacy conditions inadequate                                                 |
| Investigational Product/Device | Discontinuation Criteria met, but IP not discontinued                          |
| IRB/EC Regulatory              | IRB/EC Approval expired                                                        |
| IRB/EC Regulatory              | GCP non compliance                                                             |
| IRB/EC Regulatory              | Non-delegated task performed by staff                                          |
| IRB/EC Regulatory              | Training of site personnel not completed prior to performing study assessments |
| IRB/EC Regulatory              | IRB/EC Approval not received                                                   |
| Other, specify                 | Other                                                                          |
| Randomization Related          | Incorrect Randomization Assignment                                             |
| Study Procedure Related        | Study Procedure Missed                                                         |
| Study Procedure Related        | Study Procedure Out of Window                                                  |
| Study Procedure Related        | Assessment impacted by inadequate equipment                                    |
| Study Procedure Related        | Assessment performed in error                                                  |
| Study Procedure Related        | Study Procedure Completed/Not Resulted                                         |
| Study Visit Related            | Study Visit Missed                                                             |
| Study Visit Related            | Study Visit Out of Window                                                      |
